📍 New Delhi

SUMMARY

Computer Science undergraduate at NIT Delhi with strong interest in software development, AI/ML systems, and scalable web applications. Experienced in building full-stack applications, solving real world problems and intelligent system design. Passionate about solving complex problems using data structures, algorithms alongside, continuously exploring machine learning and deep learning concepts.

EDUCATION

National Institute of Technology Delhi

Bachelor of Technology, Computer Science and Engineering (CGPA – 8.93)

08/2024 – 05/2028

New Delhi, India

TECHNICAL SKILLS

Languages: C, C++, Python

Web Development: Python, React.js, SQL, Flask, REST APIs, Vercel, Render, Railway

Machine Learning: PyTorch, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

Developer Tools: GitHub, Supabase, Firebase, MySQL Workbench, Google Colab

CS Fundamentals: DSA, DBMS, OS, OOPS, AI, Computer Architecture and Organisation

PROJECTS

🎯 **Video Understanding AI** *Python, PyTorch, Whisper, SmolVLM2, Qwen2.5, FFmpeg*

Engineered an **end-to-end offline multimodal video intelligence system** combining three AI models- Whisper ASR for speech-to-text, SmolVLM2-2.2B for frame-level visual scene analysis, and Qwen2.5-7B LLM for final summarization-with an **intelligent temporal chunking pipeline** to process arbitrarily long videos within an 8 GB VRAM constraint.

Implemented a **dual parallel processing pipeline** per chunk-fusing audio transcripts and visual scene descriptions before LLM-based synthesis; packaged as a **pip-installable module** with a single-function API supporting fully customizable prompts for summarization and topic extraction via CLI.

🎯 **PrintEase** | **Demo Link** *MongoDB, Express.js, React.js, Node.js, Razorpay, Google Drive API, Vercel*

Built a **full-stack MERN application** for college print centers allowing students to upload documents via browser or **Google Drive**, configure per-document print settings (type, sides, copies, page range), and pay online via **Razorpay** eliminating physical queues. Designed **RESTful APIs**, JWT-based authentication, and real-time status tracking.

Engineered a **role-based admin portal** enabling print center operators to manage and filter orders by status, verify payments, toggle printer availability, and export date-range revenue reports as **CSV**. Modeled a **MongoDB Atlas schema** for persistent storage of users, orders, and payment records.

ACHIEVEMENTS

- Consistently ranked in the **top 5%** of the batch at **NIT Delhi**.
- Solved **300+ Data Structures and Algorithms problems** on **LeetCode**.
- **Winner** - Synergy Workshop Competition, NIT Delhi (2025).
- **Ranked in top 10 teams** - TRAE Hackathon, NIT Delhi (2026).
- **Finalist** - MathWorks CodeMatrix Sprint Hackathon; ranked among the **top 6 teams out of 30**.

EXTRACURRICULAR ACTIVITIES

- Sector Co-Head in Training and Placement Cell, NIT Delhi
- Member of Think India Club, NIT Delhi
- Active participant in hackathons including Flipkart GridHackathon, ET Gen AI Hackathon etc.
